

## Charging:

The battery requires a full charge before it's first use and can take up to two hours until fully charged.

When in use, the red light flashes rapidly three times, the battery needs charging. Use the included USB cable or remove the battery and charge through a separate Li-ion 18350 wall charger.

## Warranty:

The device carries a one-year limited warranty from the purchase date. The warranty can only be claimed by the original owner of the device.

We do not warranty glass parts or if the device is physically damaged.

**TRIO III**  
USER MANUAL

## Introduction

The TRIO III is a true all-in-one vaporizer, built for dry herb, concentrates, CBD oils, and E-liquids. The built-in smart chip recognizes which of the three included long life atomizers you've chosen, whether the glazed aluminum herb chamber, the ceramic wax chamber, or the CBD atomizer, and auto sets the appropriate heating mode.

The TRIO III features an isolated air path design, 3 interchangeable heating chambers, a removable battery, and more.

## Items included:

1 TRIO III

1 Dry Herb Chamber

1 Concentrate Chamber

1 CBD Atomizer Connector

1 Screw nut

1 Carrying case

1 Packing tool

1 Glass mouthpiece

1 USB cable

1 18350 battery

1 Cleaning brush

1 User manual

## Technical Specifications:

Size: 76×56×24 mm

Battery voltage: 4.2 V

Three temperature settings:

170°C(333°F)

190°C(374°F)

210°C(410°F)

## User Guide:

1. Open the magnetic front panel.
2. Load or replace the 18350 battery.
3. Unscrew the mouthpiece to insert or replace a heating chamber.
4. Load botanical flowers or concentrate into the appropriate chamber(or top load while the chamber is in the TRIO III.)
5. Place the chamber into the TRIO III(the white ring will flash 2x to indicate chamber recognition.)
6. For flowers and concentrate, screw the mouthpiece back onto the device.
7. For 510 thread CBD and E-liquid atomizers, screw on the 510 thread connector, use the round coin-like Screw nut to tighten, and then insert your cartridge.
8. Press the power button 5 times to turn on the device, and the LED light will flash 3 times.
9. Press the button 2 times to rapidly change temperature values: 170°C, 190°C or 210°C.

## For Dry Herb:

1. Press the button for 3 seconds and release to start heating. The power ring LED will blink.
2. After a moment or two, start drawing and enjoy.

Press the button 2 times to rapidly change temperature values:

Blue LED: 170°C{338°F}

Green LED: 190°C{374°F}

Red LED: 210°C{410°F}

## For Concentrate:

1. Press and HOLD the button to heat, up to 30 seconds, before the white power ring LED flashes rapidly five times to indicate auto shut off.

2. To continue heating, repeat step 1.

Press the button 2 times to rapidly change temperature values:

Blue LED: 170°C{338°F)

Green LED: 190°C{374°F)

Red LED: 210°C{410°F)

## For CBD or E-Liquid:

1. Screw on the CBD connector and tighten with the round coin-like Screw nut.
2. Screw on a 510 thread CBD or E-liquid atomizer.
3. Press and HOLD the button to heat, up to 30 seconds before the white power ring LED flashes rapidly 5x, to indicate auto shut off.
4. To continue heating, repeat step 3.

## Cleaning:

For the Dry herb chamber, unscrew the mouthpiece, then remove and sweep out the chamber with the Cleaning Brush or a cotton swab.

For the Wax chamber, unscrew the mouthpiece, then remove and swab out the chamber with a cotton swab dipped in alcohol, and follow up with a brief burn-off.

Separate the mouthpiece and swab clean. Soak the metal screen in alcohol if oil builds up.
